

*I love my grandma. ♡
I hate her pension.*

On a European level, PES Women calls for:

- a common target to reduce the gender pay gap by 2 percentage points per year and per Member State for all age groups
- monitoring the reduction of the gender pay gap through audits at European level
- clear and dissuasive sanctions in European legislation in case of non-fulfilment of the objectives

Women's pensions are 39% lower than men's in the EU.

Close the gender pay gap, close the pension gap.
